Gaziantep, Gaziantep 27410,
Turkey

Deadline for manuscript
submissions:

closed (20 October 2023)

Message from the Guest Editor

Bioactive components have great importance in food and pharmaceutical products because of their health benefits. However, their susceptibility to environmental conditions makes them difficult to be used in food, cosmetic and pharmaceutical products in their pure form without encapsulation. Encapsulation is a process which helps to improve the stability and controlled release properties of bioactive components. Encapsulation technology describes enclosing active agents within a protective wall material at the micro/nano scale. The enclosed active agents are protected from undesirable interactions, thereby enhancing stability during processing or storage and increasing bioavailability. In encapsulation technology, different methods under varying conditions are employed to improve the encapsulation efficiency and retention of encapsulated bioactive compounds.

This Special Issue aims to highlight advances in encapsulation technology employed to form the capsules, and in controlled release systems to release food bioactive components from the capsules. Therefore, studies that involve innovative approaches to encapsulation and controlled release systems are warmly welcomed.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Food Science & Technology*) / CiteScore - Q1 (*Health Professions (miscellaneous)*)
