The Generation and Control of Harmful Products in Food Processing Volume II

Guest Editors:

Prof. Dr. Maomao Zeng

State Key Laboratory of Food
Science and Resources, Jiangnan
University, Wuxi 214122, China

Dr. Xiaodong Lin

Zhuhai UM Science & Technology
Research Institute, Zhuhai, China

Dr. Biao Zhang

College of Life Sciences, China
Jiliang University, Hangzhou
310018, China

Deadline for manuscript
submissions:

29 February 2024

Message from the Guest Editors

In order to obtain satisfactory quality, food materials are usually processed. However, along with improving the food quality, harmful products may also be generated, such as heterocyclic amines, advanced glycation end products, acrylamide, ethyl carbamate, methylimidazole, etc. Recently, studies in this area have become significantly more popular, particularly studies addressing the detection methods employed, the generation of these harmful products, the existence of these products in different food systems, and the inhibition of these products using various techniques.

Based on the increasing concern regarding the safety of food processing procedures, it is of great value to report the latest research on the detection methods, generation and control of harmful products.

We invite the submission of full research papers, review articles and communications addressing the related topics.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Food Science & Technology*) / CiteScore - Q1 (*Health Professions (miscellaneous)*)
