Deadline for manuscript  
submissions:

**closed (31 December 2019)**

### Message from the Guest Editors

The general purpose of this Special Issue, “Extraction Strategies to Recover Bioactive Compounds, Incorporation into Food, and Health Benefits”, is to expand the information on bioactive compounds when applied to the food industry. Therefore, the objectives are: To address new ways to extract bioactive compounds (phytochemicals, proteins, peptides, fatty acids, etc.) from raw material in a sustainable way and using food grade conditions, to incorporate these bioactive compounds into the food matrix, and to evaluate their health benefits. This Special Issue will discuss ways to recover different bioactive types and to incorporate them into the food matrix. Moreover, the health benefit has to be supported in the food. Furthermore, the valorization of agri-food waste is a challenge and obtaining bio-based products based on bioactive compounds is a plausible way. We are particularly interested in studies focusing on the extraction of bioactive compounds, including antioxidants, from agri-food residues and guided at the study of their health benefits and functional food applications.

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (*Food Science & Technology*) / CiteScore - Q1 (*Health Professions (miscellaneous)*)
