Forest Plant, Soil, Microorganisms and Their Interactions

Guest Editors:

Dr. Fuxi Shi

Dr. Xianwei Wang

Dr. Yang Zhang

Dr. Jiusheng Ren

Deadline for manuscript
submissions:

27 September 2024

Message from the Guest Editors

Forests are the most important terrestrial ecosystem in the world. These can provide diverse ecosystem services such as food production, biodiversity conservation, sand storm prevention, water and soil conservation, nutrient cycling, and carbon sequestration, etc.

It is well-known that the plant, soil and microbes do not exist alone in forest ecosystem; rather, they are tightly linked to each other. However, there are still many gaps in our understanding of the plant, soil, microorganisms and their interactions in forest ecosystems.

We welcome the contribution of studies on plant functional traits, soil chemical process, soil carbon cycling, soil microbial diversity and their interactions in forests, including case studies, meta-analysis and model studies, to this Special Issue with the aim of promoting forest management.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
