Detection, Identification and Control of Plant Pathogens

Guest Editors:

Dr. Stefania Mang

Prof. Ippolito Camele

Dr. Rosa Paola Radice

Dr. Danut Chira

Deadline for manuscript submissions:
15 September 2024

Message from the Guest Editors

The early detection, identification, characterization, and control of plant pathogens is critical, paying particular attention to the invasive ones, affecting agricultural crops or forests, and making use of the novel products, technologies, and knowledge. Knowledge about the efficiency and use of plant-based extracts and microbial biological control agents (MBCAs) in controlling phytopathogens of agricultural crops or forests is becoming more and more valuable to manage plant pathogens and move towards green chemistry in agriculture.

This Special Issue, focusing on the detection, identification, characterization and control of plant pathogens of agricultural crops or forest hosts, will comprise highly interdisciplinary quality studies combining plant pathology with forestry, molecular biology, genetics, chemistry and agriculture. Research articles will cover a wide array of plant disease knowledge from their early diagnosis applying novel technologies to understanding their manifestations and providing new and essential data for their management and control. All types of articles, such as original research papers, opinions, and reviews, are very much welcome.

Special Issue

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.
Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
