Assessment of Forest Biomass Using Inventory Plots and Modeling

Guest Editors:

Dr. Mauricio Zapata Cuartas

Finite Carbon Corporation,
Wayne, PA 48184, USA

Prof. Dr. Bronson P. Bullock

Warnell School of Forestry and
Natural Resources, University of
Georgia, 180 E Green Street
Forestry Building, Office # 4-529,
Athens, GA 30602, USA

Prof. Dr. Peter L. Marshall

Department of Forest Resources
Management, University of
British Columbia, Rm 2045, 2424
Main Mall, Vancouver, BC V6T
1Z4, Canada

Deadline for manuscript
submissions:

closed (28 April 2023)

Message from the Guest Editors

The accurate assessment of forest biomass has a critical role in the participation of forests in the emission reduction market, and as a key indicator of forest productivity, dynamics and health. A steadily growing interest has sought to reduce cost and improve biomass estimates in woody vegetation areas by combining sophisticated statistical analysis methods and cutting-edge technologies with established forest inventory plots. Many methods are available for biomass estimation, ranging from traditional direct field measurements to indirect methods using remote sensing sources. However, technical challenges and opportunities for more cost-effective biomass assessment reporting remain as modeling and multiscale data sources continue to evolve and advance.

This Special Issue aims to provide a selection of contributions to outline the state-of-the-art on quantitative methods using ground forest plot inventories for reliable forest biomass, and to identify gaps where research is needed.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
