

## Influence of Environmental Changes on Forest Soil Quality and Health

Guest Editors:

**Dr. Yuanying Peng**

Department of Biology, College of Arts and Sciences, Lewis University, Romeoville, IL 60446, USA

**Prof. Dr. Xiaoyong Chen**

Biology Program, College of Arts and Sciences, Governors State University, University Park, IL 60484, USA

**Prof. Dr. Wende Yan**

College of Life Science and Technology, Central South University of Forestry and Technology, Changsha 410004, China

Deadline for manuscript submissions:

**31 October 2024**

### Message from the Guest Editors

Natural disturbance and human activity have resulted in significant structural, functional and environmental changes in forest ecosystems. These changes directly or indirectly impact the quality and health of forest soil. Key indicators of these impacts include soil organic matter, carbon pools, carbon sequestration capacity, soil fertility, nutrient cycling, soil water content, soil temperature, soil fauna, and the composition and activity of soil microorganisms. However, the specific extent and mechanisms of how environmental changes affect soil quality and health are still not fully understood. This Special Issue aims to provide an overview of recent developments in the field of forest soil quality and fertility in relation to environmental change.

Potential topics include, but are not limited to:

- Amount and distribution of carbon stocks in soil;
- Ecological stoichiometry of soil nutrients;
- Carbon sequestration capacity;
- Evaluation of soil quality;
- Dynamic patterns of soil CO<sub>2</sub> efflux;
- Phytoremediation of polluted soils;
- Role of soil animal community in the improvement of soil property;
- Relationships between soil physicochemical properties and soil carbon pools.

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
