### Message from the Guest Editors

Dear Colleagues,

Forest soil microbiota is an important mediator of biogeochemical process and plays key roles in the environmental ecosystem. It contributes to a range of essential soil processes involved in the cycling of carbon, nitrogen, and phosphorus. Forest soil microbiota is responsive to the effects of global change, such as climate warming, drought, anthropogenic nitrogen as well as heavy metal, antibiotic, and microplastic contamination. However, these responses often reflect the specificities of each studied forest ecosystem, and the full incorporation of microbes into predictive models is lacking. The understanding of microbial ecology in forest soils has advanced greatly recently, but it remains incomplete. Therefore, elucidating the dynamics of forest soil microbial communities after various disturbances is crucial for understanding ecosystem restoration and sustainability. This Special Issue will cover some advances in changes of forest soil microbiome in response to various disturbances and novel findings that contribute to developing a comprehensive understanding of the roles of the microbiota in forest soils during disturbances.

Dr. Jing Cong

## Editors-in-Chief

### Prof. Dr. Timothy A. Martin

School of Forest Resources and Conservation, PO Box 110410, University of Florida, Gainesville, FL 32611-0410, USA

### Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
