Message from the Guest Editors

Mangrove forests are critical sources of goods and services to society in tropical and subtropical latitudes. However, despite their ecological and economic value, they have been negatively impacted at different local and regional scales in the last 60 years. Any wetland loss underscores the urgency of implementing better management of current healthy mangrove areas. Nevertheless, we lack data and information to develop effective strategies for the conservation and sustainability of mangrove wetlands under different levels of deterioration and environmental settings. Thus, a comparative analysis of “what works” and “what does not” when rehabilitating or restoring mangrove wetlands is needed.

For this Special Issue, we encourage studies from all fields, including experimental and observational studies, monitoring approaches, and modeling. This collective effort will help to synthesize the most recent “lessons learned” to continue advancing knowledge, understanding, and adaptation strategies to protect and conserve one of the most productive ecosystems in the world.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
