Message from the Guest Editors

This Special Issue plans to give an overview of the most recent advances in biodiversity/ecosystem management using state-of-the-art technology.

Potential topics include, but are not limited to:

Promoting knowledge of dynamic drivers, patterns, and processes of ecosystem change due to climate change and land-use change;

Quantifying and mapping habitat conditions including quality, structure, and functions of the ecosystem;

Innovative assessment method of response and management of biodiversity/ecosystem using new techniques;

Evaluation of the co-benefits or trade-offs of other aspects (food and energy security, carbon neutrality, economic development, etc.) according to conserving biodiversity/ecosystem;

Novel approaches for managing ecosystems considering practical linkage with global environmental issues under climate change and land-use change.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
