closed (20 August 2021)

Message from the Guest Editor

Globally, there has been increasing interest in bringing nature back into urban centers and the multiple benefits and services provided by urban forests. The Covid 19 pandemic has crystallized thinking about the importance of accessible nature in times of lockdown and stress. But there are challenges in maintaining existing forest remnants in urban environments, and in restoring or reconstructing forest habitats, which are resilient and sustainable in the face of increasing population, development, and climate change. This Special Issue will draw on experience from around the world in the theory and practice of urban forest restoration, to achieve all or some of the multiple benefits of retaining or expanding urban forests. We are particularly interested in examples of intergenerational projects, at a local or regional scale, which highlight adaptive management approaches to the success and failure experienced along the way. As urban forestry is transdisciplinary, and successful urban ecological restoration involves understanding and navigating coupled socio-ecological systems, we welcome contributions from a wide range of disciplines, as well as those which bridge disciplines.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
