Advances in Technology and Solutions for Wood Processing

Guest Editors:

Dr. Ján Kováč

Department of Environmental
and Forestry Machinery, Faculty
of Technology, Technical
University in Zvolen, Študentská
26, 96001 Zvolen, Slovakia

Dr. Richard Kminiak

Department of Woodworking,
Faculty of Wood Sciences and
Technology, Technical University
in Zvolen, T. G. Masaryka 24,
96001 Zvolen, Slovakia

Prof. Dr. Paweł Tylek

Faculty of Forestry, University of
Agriculture in Krakow, 31425
Krakow, Poland

Deadline for manuscript
submissions:

31 October 2024

Message from the Guest Editors

Wood is a natural resource that creates challenging conditions for processing machines. It is necessary to appropriately mechanize wood processing to produce a process sufficient to fast and high-quality operations associated with wood processing. Research and development are currently devoted to the improvement of existing methods of mechanical wood cutting and the development of new systems for further processing of wood.

Wood cutting is generally defined as a basic technological process in the production and processing of wood. It significantly affects the organization of production, efficiency, work safety, product quality and the amount of energy consumed. Understanding these factors and their mutual interactions will help researchers to fully understand the very principle of the woodworking process. Knowledge of this issue will help us to eliminate undesirable negative phenomena during wood processing and thus the loss of wood raw material, improving the quality of the entire process from various points of view.

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
