# **Application of Molecular Genetic Tools for Forest Pathology**

Guest Editors:

### Dr. Nevenka Ćelepirović

Division of Genetics, Forest Tree Breeding and Seed Science, Croatian Forest Research Institute, HR-10450 Jastrebarsko, Croatia

#### Dr. Sanja Novak-Agbaba

Division of Forest Protection and Game Management, Croatian Forest Research Institute, Cvjetno naselje 41, 10450 Jastrebarsko, Croatia

#### Dr. Aikaterini Dounavi

Department of Forest Protection, Forest Research Institute of Baden-Württemberg, Wonnhaldesttr. 4, 79100 Freiburg, Germany

Deadline for manuscript submissions:

30 April 2024

## **Message from the Guest Editors**

The involvement of molecular genetics in plant pathology aims to improve our understanding of dynamic interactions among various biotic and abiotic components, develop new methods for forest tree pathogen protection. and develop effective disease management strategies. New molecular genetic methods find application in both pests and pathogen diagnostics, control and management activities. In the field of diagnostics, several molecular genetic methods are available for identifying different pest/pathogen species and pathogen strains, as well as their evolutionary relationships. In the field of pests and pathogen control, the identification of genetic markers associated with tree resistance provides information that can be used in breeding programs for disease-resistant trees. This Special Issue provides a comprehensive overview of the latest developments in the application of molecular genetics in forest pathology. It aims to highlight advances in the use of molecular genetic tools in forest pathology, covering topics such as disease diagnostics, pests and pathogen detection and diversity, hostpathogen interactions, and disease management.

### **Editors-in-Chief**

#### Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

### Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

# **Message from the Editorial Board**

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
