Message from the Guest Editors

Dear Colleagues,

The 21st century is witness to novel trends in land-cover change and associated management regimes concerned with rural and forested areas in the Global South. Globalization has transformed these managed landscapes, economically, biophysically, and demographically, introducing new structures atop pre-existing dynamics.

Descriptions of emergent land-change 'events' entailing forest gain, loss, or transformation in managed landscapes across the Global South have often characterized them as ends unto themselves, without regard to underlying historical or ensuing dynamics. In response, this special issue invites integrative perspectives on major emergent trends in land-use/cover change and associated political/economic management regimes across the Global South. Attention is given to lands and forests in rural or managed landscapes, the human dimensions of their development, emergent roles of the State and other relevant stakeholders influencing or reacting to novel trends, and to the concept of forest transformation—understood as the increasingly anthropogenic character of forest cover without corresponding major changes to overall forest area.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
