### Message from the Guest Editor

Livestock grazing in forests and woodlands has traditionally been practiced in many parts of the world and is an important aspect of cultural and ecological heritage. It has been reported to enhance tree growth and promote biodiversity, while the livestock and wild herbivores are an important economic asset to many rural communities. Moreover, grazing in forests can be an essential tool in improving the efficiency of wildfire risk reduction in regions suffering from wildfires. Despite the above, forest grazing has not been widely accepted in Europe and elsewhere. There have been studies indicating that grazing herbivores decrease soil quality and pose a serious threat to the biodiversity and regenerative capacity of woody species, thus decreasing the social and economic value of multi-purpose forests.

In this Special Issue, we encourage experimental studies, surveys and reviews related to any aspect of forest grazing. Potential topics include sustainable grazing management techniques, monitoring approaches and models, social-ecological aspects, etc. We invite contributors to share knowledge, discuss current trends and form future ones.

## Editors-in-Chief

### **Prof. Dr. Cate Macinnis-Ng**

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

### **Prof. Dr. Giacomo Alessandro Gerosa**

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
