Message from the Guest Editor

Dear colleagues,

In the last decennia, global trade and climate change have increased the introduction of invasive alien species and increased the impact of eruptive forest pests on the forests over the world. The first step to take action against forest pests is to identify which species they are. In recent years, more and more effort is being focused on developing diagnostic tools for the identification of forest pests; however, despite this, taxonomists are being less and less valued for their work. This Special Issue will focus on the diagnostics of forest pest insects. We would like to invite authors to submit their articles dealing with cutting-edge diagnostic methods, less known forest pests which might be problematic in other continents or in their own continents, and global overviews of taxonomic groups of forest pests.

Dr. Maarten De Groot

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
