Deadline for manuscript submissions: closed (15 September 2023) Dear Colleagues,

Forest soil is a habitat of numerous Earth organisms, including microfauna, mesofauna, and megafauna. Soil organisms have a crucial influence on soil processes, soil health, water and air flows, and energy fluxes. Moreover, soil organisms fulfill key processes in the soil, such as decomposition and nutrient mineralization.

In this Special Issue, we are aiming to build a collection of recent research findings and review and meta-analysis articles on soil biology and biochemistry. Moreover, we welcome papers dealing with the importance of soil biodiversity, machine learning in soil biochemistry, spatial modeling of soil fauna, soil and soil food web, and the interaction between soil biology with soil physicochemical properties and processes to regulate belowground functions. We look forward to receiving your contributions.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and crossdisciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
