Message from the Guest Editors

Woody oil species not only provide natural, healthy and high-quality edible oils and other bio-based products, but also play an important ecological role in carbon sequestration on barren land.

This Special Issue will comprise a collection of papers reporting recent advances in the research of woody oil species.

This Special Issue includes, but is not limited to, the following topics:

- Molecular biology of lipid synthesis of woody oil species;
- Biochemical study of woody oil species;
- Study on planting, production and processing technology of woody oil species;
- Product quality evaluation of woody oil species;
- Multipurpose research such as landscape, functional drinks, food industry, biopharmaceutical, etc., of woody oil species;
- Industrial system of circulation and consumption of woody oil species;
- Studies focusing on the health industry, such as the infrastructure and industrial planning, etc., of woody oil species;
- Research on the eco-tourism industry, such as the landscape design, etc., of woody oil species.
