Deep Learning and Natural Language Processing

Guest Editor:

Dr. Paulo Quaresma
Algoritmi Research Center, Informatics Department, University of Évora, 7002–554 Évora, Portugal

Deadline for manuscript submissions:
closed (31 January 2023)

Message from the Guest Editor

In the last years natural language processing tasks have been able to improve significantly their performance through the use of deep learning methodologies. Machine translation, summarization, and question-answering systems are some examples of tasks that were able to reach a high level of performance.

In this special issue we welcome new research contributions and survey papers describing advances in this relevant domain, with a special focus, but not exclusively on:

- Deep learning architectures specialized for NLP;
- Deep learning based approaches to NLP tasks, such as, NERC, syntactic parsers, semantic analysis, semantic role labeling, information extraction, sentiment analysis, summarization, question-answering and machine translation;
- Hybrid (symbolic + deep learning) approaches to NLP;
- Text annotation using deep-learning approaches;
- Survey papers.

Special Issue

Editor-in-Chief

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.
Journal Rank: CiteScore - Q1 (*Computer Networks and Communications*)
