

New Developments in RFID Technologies and Applications and Their Integration into IoT

Guest Editor:

Message from the Guest Editor

Prof. Dr. Raed A. Abd-Alhameed

Faculty of Engineering and Informatics, University of Bradford, Bradford BD7 1DP, UK

Deadline for manuscript submissions:

closed (31 December 2018)

RFID, though widely accepted as an exciting technology, presents several significant design challenges and issues to engineers and researchers. These issues arise from the context-aware processing of RFID data, achieving efficient matching and read range, developing novel smart IoT-based applications, achieving smart and human interaction, and privacy and security issue of RFID data within the IoT context.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.

Journal Rank: CiteScore - Q1 (*Computer Networks and Communications*)
