### Message from the Guest Editor

Dear Colleagues,

Original research, reviews, and creative means of covering a variety of pharmacogenetics-related subjects in psychiatry are welcome in this Special Issue. The use of pharmacogenetics in clinical practice, the development of legislative tools and infrastructure related to pharmacogenetics, the search for novel pharmacogenetic markers specific to psychiatric treatments, the importance of epigenetics and rare genetic variants in pharmacogenetics, and innovative protocols for pharmacogenetic research are just a few of the subjects welcome.
