Deadline for manuscript submissions: closed (20 September 2023)

Message from the Guest Editor

Dear Colleagues,

Livestock breeding has been successful at delivering genetically improved material for multiple traits based on recurrent cycles of selection, mating, and testing. Genetic dissection approaches have been ongoing to effectively drive operational genome enabled selection. The convergence of high-throughput genomics and quantitative genetics has established new paradigms that are changing contemporary breeding dogmas. In light of a recent advance in livestock genetic breeding and quantitative genomics research, we invite you to review the main concepts, analytical tools, and remaining challenges that currently underlie the application of genomics data to livestock breeding, also providing new opportunities to enhance the application of genomics to breeding.

Specialsue

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan

Department of Pathology, The University of Alabama at Birmingham, 1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (Genetics & Heredity) / CiteScore - Q2 (Genetics)
