### Message from the Guest Editors

New phylogenetic tools and population genetics methods have been developed and vastly advanced over the last decade. We encourage submissions of unpublished original manuscripts (research articles, reviews, and communications) on non-human primates with a strong genetic or genomic component describing recent advances on all aspects related, but not limited to, the following topics: phylogenetic inference, population genetics, genetic diversity, local adaptation, genetic structure, phylogeographic inference, demographic modeling, landscape genetics, and hybridization.

Deadline for manuscript  
submissions:

## Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

**Journal Rank:** JCR - Q2 (*Genetics & Heredity*) / CiteScore - Q2 (*Genetics*)
