Genetics of Obesity

Guest Editor:

Dr. Thangiah Geetha

Department of Nutrition, Dietetics and Hospitality Management, Auburn University, Auburn, AL 36849, USA

Deadline for manuscript submissions:

20 May 2024

Message from the Guest Editor

Obesity is a major public health problem. Obesity increases the risk of developing type 2 diabetes, cardiovascular disease, cancer, sleep apnea, and a greater risk of social and psychological problems. Obesity is caused by multiple factors, such as genetic, behavioral, environmental, and metabolic. Genetics is shown to impact 40–70% of obesity, and several genes are found to be correlated with obesity. Gene mutations can contribute to obesity in any age. This Special Issue on "Genetics and Obesity" aims to provide an overview of basic, applied, clinical studies, and review articles relating to genetics and obesity.

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan

Department of Pathology, The University of Alabama at Birmingham, 1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (*Genetics & Heredity*) / CiteScore - Q2 (*Genetics*)
