## Genetics of Blood Disorders

Guest Editor:

**Dr. Andrey Sudarikov**

National Medical Research  
Center for Hematology, Novy  
Zykovski Lane, 4a, 125167  
Moscow, Russia

Deadline for manuscript  
submissions:

**closed (20 August 2023)**

### Message from the Guest Editor

The study of the genetic basis of blood disorders has been at the forefront of medical genetics since the work of Alexander Maksimov in 1909, who postulated the clonal nature of hematopoiesis. The hematopoietic system is a unique object for the study of both germinal factors leading to various hereditary diseases and somatic mutations associated with malignancies. In connection with the development of targeted therapy approaches, the study of the molecular basis of blood diseases and the search for and characterization of appropriate genetic targets for therapeutic intervention are becoming increasingly important.

We encourage the submission of original manuscripts containing new, unpublished data relating to a wide range of genetic studies in hematology. Manuscripts on molecular genetic studies of hereditary blood diseases, neoplasia of lymphoid and myeloid tissue, genetic factors associated with the prognosis of disease or the effectiveness of therapy, etc., are invited. The intended publication formats to be considered include original articles, short communications, and literature reviews.

## Editor-in-Chief

### **Prof. Dr. Selvarangan Ponnazhagan**

Department of Pathology, The  
University of Alabama at  
Birmingham, 1825 University  
Blvd, SHEL 814, Birmingham, AL  
35294-2182, USA

## Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

**Journal Rank:** JCR - Q2 (*Genetics & Heredity*) / CiteScore - Q2 (*Genetics*)
