Emerging contaminants (ECs) in Groundwater

Guest Editor:

Prof. Dr. Maurizio Barbieri

Department of Chemical Engineering Materials Environment (DICMA), Sapienza University of Rome, 00185 Rome, Italy

Deadline for manuscript submissions:

closed (30 April 2019)

Message from the Guest Editor

Groundwater contamination results from widely diverse human activities. Emerging contaminants (ECs) referred to compounds previously not considered or known to be significant to groundwater (in terms of distribution and/or concentration) which are now being more widely detected.

Most emerging pollutants are not regulated in environmental, water quality and wastewater discharge regulations. Hence, this special issue is aiming at understanding which are the relevant compounds that can be found in the aqueous environment, which are or could have the potential to become emerging contaminants and the pathway by which it travels from the source, e.g. fracture flow through an aquifer. This will allow the determination of the environmental occurrence of these potential contaminants, the characterisation of their sources and pathways that determine release to the aqueous environment and definition and quantification of the processes that determine their transport and fate through the environment.

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherentset of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientificallybased political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank: CiteScore - Q1 (General Earth and Planetary Sciences)
