Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editors

Dear Colleagues,

Our Special Issue aims to explore the intersection of nursing with innovative technologies.

We invite clinicians and researchers to contribute evidence-based recommendations, articles that outline the current state of the art, and validation studies that culturally adapt existing assessment tools. Contributions may also provide new insights into the psychometric properties of these tools, enhancing their applicability in precision nursing.

Areas of interest for this Special Issue include, but are not limited to, the following:

- Systematic reviews and meta-analyses of nursing assessment tools.
- Validation and psychometric studies of existing and new nursing assessment tools.
- Comparative studies on the effectiveness of traditional vs. technology-enhanced nursing interventions, with a focus on patient-centric care.
- Innovative applications of data analysis and artificial intelligence in nursing.

We look forward to receiving your insightful contributions to this important field.

Dr. Ivan Rubbi
