Department of Psychology,
Panteion University of Social and
Political Sciences, Athens, Greece

Message from the Guest Editors

Various global crises nowadays necessitate collaboration on giving prominence to emerging mental health needs and depicting new trends in assessment, diagnosis, treatment, and psychosocial care. This Special Issue aims to publish innovative studies such as the examination of risk and protective factors, new diagnostic and treatment approaches, technological advances, and proactive strategies, all of which increase general or specific populations' resilience and post-traumatic growth and promote mental health and well-being during current crises.
