### Message from the Guest Editors

Dear Colleagues,

The scope of this Special Issue is to disseminate research evidence on integrated chronic disease management such as patients' and carers' quality of life, clinical and psychosocial problems, and compliance to treatment. This Issue may include the healthcare professionals' views and roles in holistic multicultural patient-centred care and the possible educational interventions for improving the health outcomes of patients with chronic diseases.

Articles from all healthcare settings such as community care, acute care, long-term care and mental health care are welcomed. The study population may include patients, carers, or healthcare professionals. The articles may be original research or systematic reviews. All types of study design will be considered.
