Message from the Guest Editor

This Special Issue of Healthcare seeks commentaries, original research, short reports, and reviews regarding the challenges in neonatal cardiopulmonary resuscitation. This Special Issue aims to present the current evidence, future approaches, and novel teaching techniques. It is envisioned that health care providers, researchers, health care policy specialists, policymakers, and elected officials will use this Special Issue as a resource for writing intelligent and progressive healthcare policies.

- delivery room
- neonatal intensive care unit
- asphyxia
- chest compression
- vasopressors
- training and education
- neonatal resuscitation program
- pediatric advanced life support
