and Management, Open  
University, Rua Almirante  
Barroso, 38, 1000-013 Lisboa,  
Portugal

**Prof. Dr. Isabel M. Santos**

Department of Education and  
Psychology, University of Aveiro,  
3810-193 Aveiro, Portugal

### Message from the Guest Editors

Most cancer survivors still experience distress, depression, anxiety, a diminished quality of life, fear of cancer recurrence, unmet needs, cognitive impairment or other long-term psychological effects to a great extent. Such conditions represent a challenge not only to the cancer survivors, but also to their informal caregivers.

Deadline for manuscript  
submissions:
