Message from the Editor-in-Chief

High-Throughput (ISSN 2076-3905) is an open access journal committed to the publication of biological and molecular data as well as methodological approaches based on high-throughput technologies.

The journal accepts original articles and timely reviews aimed at expanding knowledge in various branches of science, ranging from biology and medicine of humans to biology and biotechnology of animals or plants. Studies aimed at developing (i) the necessary computational and bioinformatics methodologies or (ii) devices designed to improve current methodological approaches or to automate different experimental phases will also be considered. We invite you to publish your next paper with us.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program
-  **Thorough Peer-Review**
-  **High visibility** Citations available in PubMed, full-text archived in PubMed Central. Indexed in Scopus from Volume 6
-  **Rapid Publication** First decisions in 15 days; acceptance to publication in 3 days (median values for MDPI journals in the first half of 2021)
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors

Aims and Scope

High-Throughput is a multidisciplinary peer-reviewed scientific journal that provides an advanced forum for the publication of studies reporting high-dimensional approaches and developments in Life Sciences, Chemistry and related fields. Our aim is to encourage scientists to publish their experimental and theoretical results based on high-throughput techniques as well as computational and statistical tools for data analysis and interpretation.

The scope of *High-Throughput* includes, but it is not limited to:

- Microarrays
- DNA Sequencing
- RNA Sequencing
- Protein Identification and Quantification
- Cell-based Approaches
- Omics Technologies
- Imaging
- Bioinformatics
- Computational Biology/Chemistry
- Statistics
- Integrative Omics
- Drug Discovery and Development
- Microfluidics
- Lab-on-a-chip
- Data Mining
- Databases
- Multiplex Assays
