

Advanced Study on Quality Control and Metabolism of Bioactive Compounds of Postharvest Horticultural Crops

Guest Editors:

Dr. Zhaojun Ban

School of Biological & Chemical Engineering, Zhejiang University of Science and Technology, Hangzhou 310023, China

Dr. Cunkun Chen

Tianjin Academy of Agricultural Sciences, Tianjin 300384, China

Dr. Li Li

College of Biosystems Engineering and Food Science, Zhejiang University, Hangzhou 310058, China

Deadline for manuscript submissions:

25 June 2024

Message from the Guest Editors

Dear Colleagues,

Traditional chemical preservatives are not accepted by consumers because of residue and food safety problems. Therefore, it is necessary to apply advanced green preservation technology in horticultural crops to maintain the quality of postharvest horticultural crops, such as ozone and cold plasma preservation technologies, and further exploring the mechanism of these green preservation technologies is encouraged. Meanwhile, the transformation and extraction of active substances in postharvest horticultural crops during storage are also aspects that we need to focus on. The Special Issue is dedicated to original research papers, reviews, opinions, and short communications considering advanced research on postharvest horticultural crops. This includes research on physiology and molecular biology, explorations in flavor regulation and sensory evaluation, innovative techniques/methods for quality maintenance, active compound extraction, and utilization of postharvest horticultural crops.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank: JCR - Q1 (*Horticulture*) / CiteScore - Q2 (*Horticulture*)
