Food Science, Southwest
University, Chongqing 400715,
China

Deadline for manuscript
submissions:

24 May 2024

Message from the Guest Editor

The development of the tea industry now faces many challenges and questions, such as frequent climatic disasters, labor shortages and insufficient development of germplasm resources. Additionally, with the increase of diversified consumer demand in tea market, the field of tea cultivation and breeding will pay more attention to the replacement or upgrading of new varieties, new technologies and new equipments.

This Special Issue will focus on the latest developments and trends in the cultivation and breeding of tea plants. Potential topics include, but are not limited to:

- Breeding technology;
- Special germplasm resources;
- Environment and adaptability;
- Traits and production technology;
- Formation of healthy compounds;
- Nutrient management.

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank: JCR - Q1 (*Horticulture*) / CiteScore - Q2 (*Horticulture*)
