University, Bornova, 35040 Izmir,  
Turkey

### Message from the Guest Editors

Water scarcity, the increasing population, urbanization and food security problems make soilless vegetable production a real crop solution, especially in areas where soil is not available and/or an alternative. Therefore, this Special Issue aims to present recent advances in the development of soilless crop research and its impact on vegetable production worldwide. It is necessary to have frontier science and technology for the cultivation of vegetables in hydroponics and substrates, safeguarding the rigor necessary for productive success with maximum efficiency and environmental sustainability.

Deadline for manuscript  
submissions:

**20 November 2024**

## Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

**Journal Rank:** JCR - Q1 (*Horticulture*) / CiteScore - Q2 (*Horticulture*)
