# Cultivation Practices and New Technologies in Sustainable Horticulture

Guest Editors:

#### Dr. Ewa Furmanczyk

National Institute of Horticultural Research, 96-100 Skierniewice, Poland

#### Prof. Dr. Lidia Sas-Paszt

National Institute of Horticultural Research, 96-100 Skierniewice, Poland

Deadline for manuscript submissions: closed (30 October 2023)

### **Message from the Guest Editors**

The inescapable worldwide imperative to promote a reduction in the use of chemical fertilizers and plant protection products. These strategies include innovative field and orchard management practices (e.g. multifunctional cover crops, flower strips, microbial-based fertilisers, etc.), to improve overall biodiversity and soil fertility. The use of organic fertilizers, especially those derived from recycled materials, along with plant extracts or essential oils and microbial-based biostimulants or biological controlling agents is also gaining increasing interest. However, several aspects of these innovative practices still need to be addressed to further promote their adoption in practice. This Special Issue welcomes both original research articles and reviews focused on the practices mentioned above and their assessed impacts by using diverse methods (e.g. agronomical, molecular, physiological, chemical/biochemical, physical, social science, and economic, etc.) that can shed light on and improve our understanding of sustainable horticulture.

## **Editor-in-Chief**

#### Prof. Dr. Luigi De Bellis

Department of Biological and Environmental Sciences and Technologies, Università del Salento, Centro Ecotekne, Via Provinciale Lecce Monteroni, 73100 Lecce, Italy

### Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank: JCR - Q1 (Horticulture) / CiteScore - Q2 (Horticulture)
