Message from the Guest Editor

Dear colleagues,

Fruits and vegetables are the key global horticultural products cultivated for fresh consumption and for the rapidly expanding processed and pre-packaged food industry. The external and internal quality of fruits and vegetables represent essential components in consumer decision. Fruit and vegetable cultivars are visually distinctive by numerous attributes as well as diverse in terms of metabolic synthesis. The studies may focus on cultivars best suited for fresh consumption or those more appropriate for natural ingredient industry. Novel analytical qualitative and quantitative methods are of particular interest. The studies may focus on cultivars best suited for fresh consumption or those more appropriate for natural ingredient industry. Novel analytical qualitative and quantitative methods are of particular interest. In addition, comparative studies centered on physico-chemical characterization of wild and cultivated fruit and vegetable species and cultivars are also welcome.

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank: JCR - Q1 (*Horticulture*) / CiteScore - Q2 (*Horticulture*)
