

## **Selected Papers from the 2nd National Conference on Tea Plant Biology and Advances in Tea Plant Biology and Tea Quality Regulation**

Guest Editors:

**Prof. Dr. Xinchao Wang**

**Prof. Dr. Jianyun Ruan**

**Dr. Qunfeng Zhang**

**Dr. Xinyuan Hao**

**Prof. Dr. Chaoling Wei**

**Prof. Dr. Zhaoliang Zhang**

**Prof. Dr. Chuankui Song**

Deadline for manuscript  
submissions:

**15 May 2024**

### **Message from the Guest Editors**

As a health drink, tea has a long history and profound cultural accumulation and is loved by consumers all over the world. As one of the most important parts of horticultural research, tea plant biology has experienced a long period of accumulation and ushered in a golden period of rapid development. With the deciphering of the genome and the application of new technologies, remarkable progress has been made in tea plant genetics, breeding, growth and development, regulation of secondary metabolic pathways, stress response, defense mechanisms, etc. Moreover, tea quality analysis and in-depth exploration of health effects provide unprecedented opportunities for the diversified utilization of tea. At this important stage, it is very necessary to summarize the latest achievements in time, so as to provide information support for researchers and industry experts in tea science and related fields. The 2<sup>nd</sup> National Conference on Tea Plant Biology will be held in Hefei from July 23 to 24 in 2021. We warmly hope that the important progress made by researchers and graduates, including but not limited to the conference, will be published in this issue.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

**Journal Rank:** JCR - Q1 (*Horticulture*) / CiteScore - Q2 (*Horticulture*)
