Epidemiology, Medical University  
of Łódź, 90-419 Łódź, Poland

Deadline for manuscript  
submissions:

**31 May 2024**

### Message from the Guest Editor

Metabolic diseases can be classified according to many features: etiology, course, or type of metabolic reactions affected by the defect. We have no influence on some metabolic diseases (such as phenylketonuria); however, there are metabolic diseases that largely depend on our lifestyle, primarily our diet and physical activity—type II diabetes and increased LDL cholesterol (as well as other lipid disorders) are metabolic diseases that, in most cases, result from many years of neglect. They are among the conditions that, when present together, make up metabolic syndrome:

- Type II diabetes (increased blood glucose);
- Increased levels of triglycerides;
- Lowered HDL cholesterol (the so-called good cholesterol);
- Increased blood pressure;
- Abdominal obesity.

Moreover, metabolic syndrome increases the risk of cardiovascular diseases and worsens their course.

We invite authors to submit manuscripts on the epidemiology of metabolic diseases, principles of prevention (with particular emphasis on the impact of diet and physical activity), and treatment options. We want to focus on both adults and children.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
