submissions:

30 May 2024

Message from the Guest Editor

Dear Colleagues,

Eliminating health disparities and attaining healthy well-being for all are key objectives of the Healthy People 2030 initiative. A substantial body of empirical work has examined health disparities in populations, but the literature is lacking on the specific contextual determinants of these disparities.

This Special Issue aims to broaden our understanding of social, cultural, political, and economic factors and their associations with health disparities or inequities in specific contexts. We are particularly interested in original research articles (empirical and theoretical) or systematic reviews that explore the determinants of health disparities or inequities in populations. We will also consider quantitative, qualitative, or mixed methods research that examines the distribution of health disparities or assesses the impacts of policies and interventions on improving disparities. It is imperative that every manuscript considered for publication focuses on social vulnerability, social determinants of health, and/or health inequity.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
