Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses on the complex relationships between urban land utilization and disaster resilience. It aims to encourage interdisciplinary academic discussion on reducing natural hazard risks and provide stakeholders and policy-makers with multiple paths to increasing resilience of cities and communities. In this Special Issue, we welcome research contributions on topics including, but not limited to, the following:

- 1. Built environments of cities and neighborhoods;
- 2. Social capital and resilient communities;
- 3. Urban sprawl and disaster resilience;
- 4. Stakeholders in disaster management;
- 5. Spatial planning, governance, and disaster resilience:
- 6. Spatial and social inequalities in disaster resilience;
- 7. New data and methods in urban land utilization and disaster resilience;
- 8. Urban land-use transitions and environmental impact.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
