Sciences, University of Cape
Coast, Cape Coast, Ghana

Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editors

This issue of *IJERPH* is designed to highlight research on air pollution conducted in African countries and within the African diaspora. This issue will hopefully inform the scientific community about the extent of the air pollution problem and the associated health burden in these populations that has been previously overlooked. In addition, we seek to galvanize new efforts to build air pollution monitoring and research capacity, showcase air pollution data, and conduct health impact assessment within African countries and the African diaspora.

Papers addressing the topic of air pollution measurement, modelling, epidemiology, and remediation within the countries of Africa and the African diaspora are invited for submission to this Special Issue. We encourage the submission of manuscripts from local researchers working within these settings.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
