submissions:

30 September 2024

Message from the Guest Editors

The International Labor Organization recognizes that the current labor context generates structural inequalities that disproportionately impact those of a marginalized ethnicity, sexual orientation, gender identity, disability, etc. The structural nature of this inequality affects well-being, mental and physical health, and quality of life. These effects are not only observable in individuals, but also in terms of relational and social well-being, coexistence, or social exclusion of the general population.

This Special Issue aims to attract multidisciplinary researchers analyzing the causes and effects of these inequalities. Potential topics include (but are not limited to):

New conditions of labor precariousness and their impact on health.

Gender labor gap.

Gig Economy.

Youth, careers, and well-being.

Ageism and technological competence discrimination.

Structural labor discrimination.

Promotion of occupational mental health.

Suicide and working conditions.

Care economy.

LGBTIQ+ labor discrimination.

New forms of labor relations and their impact on well-being: 4-day working weeks, teleworking, and working on platforms.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
