Message from the Guest Editor

Scientific evidence on the determinants of health of populations clearly shows that alcohol use is one of the leading causes of death worldwide. Despite the numerous organized efforts undertaken by governmental, public and private bodies to prevent and diminish the health and social threats caused by alcohol, they still exist. Alcohol use impacts mental health and increases the risk of injuries and infectious and noncommunicable diseases (e.g., digestive, cardiovascular and cancers).

The complexity of the problem and the challenges of changing alcohol-related behavior require an interdisciplinary approach. Therefore, we invite reviews as well as quantitative, qualitative and mixed methods studies from the epidemiology, health, social sciences, public policy, communication, education and other relevant fields. The listed keywords suggest just a few of the many possible subject areas.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
