COVID-19, Healthcare Quality, Patient Safety and Quality of Life

Guest Editor:

Prof. Dr. Mosad Zineldin

Department of Medicine and Optometry, Faculty of Health and Life Sciences, Linnaeus University, SE-35195 Växjö, Sweden

Deadline for manuscript submissions:

closed (30 August 2022)

Message from the Guest Editor

Patient safety and a good quality of care are considered to be a right for all patients and the responsibility of all staff within hospitals (Zineldin, 2006). They are all related to quality of life.

Human error is almost unavoidable, even for the most experienced, trained and qualified physicians and other healthcare providers. Medical errors (MEs) are one of the leading causes of death and injury in many countries.

Many studies have found that poor medical care or even the rude treatment of patients by providers dissatisfies patients, discourages them from seeking care and returning for services, and prompts them to switch physicians.

In addition, the healthcare system (HCS) is facing the challenges created by the COVID-19 pandemic and crisis. To respond to the crisis, the HCS had to instantly reorganize, with little time to reflect on the roles to assign to patient safety (PS) and quality improvement (QI).

This Special Issue reflects an effort to capture current developments in the patient safety, healthcare quality and overall quality of life fields, and to provide a forum for cutting-edge contributions to the literature.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
