Dr. Sabine Renggli

Ifakara Health Institute, Ifakara 67501, Tanzania

Deadline for manuscript submissions:

closed (1 April 2023)

Message from the Guest Editors

This Special Issue focuses on the continuum of health care supported by digital technologies: from disease screening and detection in the community, to triage, and clinical decision support, as well as electronic medical records in health facilities, central health information systems enabling ministries of health, and public health departments for exploring disease trends and making datadriven decisions. We invite submissions of articles that offer evaluations of digital tools in these settings—integration and interoperability of systems—enforcing good software development standards and practices, as well as ethical data security challenges surrounding development, implementation, and use. We accept most types of articles: conventional research articles, reviews, case reports, and commentary/viewpoints, and encourage the submission of high-quality, descriptive and hypothesisgenerating papers focusing on innovative software features and functionalities, as well as digital health landscape analyses.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
