Deadline for manuscript submissions:

closed (30 September 2021)

Message from the Guest Editors

Health emergency disaster risk management (Health-EDRM), one of the latest academic and policy frameworks advocated by WHO since 2019, refers to the systematic analysis and management of health risks surrounding emergencies and disasters.

Since 2018, the first and the second edition of the Special Issue of IJERPH focusing on Health-EDRM have selected and published 36 papers successfully. These papers described a diverse range of health-related disaster and emergency risk management analyses that focused on short- and long-term health impacts, associated risk factors, risk assessment methods and tools, multidisciplinary research methods related to program evaluation and policy analysis, etc. In 2020, the COVID-19 pandemic brought forth enormous direct and indirect health impacts globally. The many unresolved issues linked to this novel disease make conducting health risk management and evidence-based response program and policy planning extremely difficult for both health and non-health actors. In response to urgent research needs, a third edition of the Special Issue for Health-EDRM is now calling for submissions.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
