Message from the Collection Editor

Dear Colleagues,

Nursing professionals are a key element of the health system. They provide care to people and the community with the aim of restoring health or preventing disease. These ambitious objectives require a body of solid and specific knowledge. For this reason, this Topical Collection seeks to present papers that enrich this body of knowledge. Priority will be given to research results related to quality of life, health promotion, the economic effect of care, interventions related to education, advanced practice nursing, nursing administration, and evidence-based nursing interventions. All these topics should be approached from the point of view of nursing. Both quantitative and qualitative methodologies will be considered.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
