Prof. Dr. Melitta McNarry

Applied Sports Technology, Exercise and Medicine (A-STEM) Research Centre, Faculty of Science and Engineering, Bay Campus, Swansea University, Swansea SA1 8EN, UK

Deadline for manuscript submissions:

closed (28 February 2023)

Message from the Guest Editors

This Special Issue is devoted to the study of interaction between physical activity and health behaviors. Research on the physiology, biochemistry, psychology, and biomechanics of health development is welcome. Physical activity is closely linked with health and well-being, and is also associated with individual behavior. Empirical evidence regarding the prevalence of exercise health behaviors can help individuals develop their bodies and improve their health status. Regular physical activity can help keep people think, learn, and improve judgment and cognitive skills as they age. Physical activity can also help to control weight and minimize obesity-related diseases. Good health behaviors can convey health benefits and protect individuals from disease. Therefore, more studies such as those presented in this volume are required. This will help us to design interventions for improving health that may change the behaviors and habits of individuals in order to make physical activity and healthy behavior the preferred option for individuals.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
