Message from the Guest Editors

Dear Colleagues,

The steady aging of the world's population poses a widely acknowledged challenge to many domains of human life. This has prompted academic researchers to seek viable, technologically aided solutions to make the individual aging process a far more positive experience. The main focus is enhancing overall functional self-reliance in seniors, and eliminating any undue anxiety from their daily life. That is why we aim to present a wide scope of research, mostly addressing innovative application of modern technologies, e.g., Virtual Reality (VR). Such an approach drives overall development and promotes appreciable advances in geriatric physiotherapy and rehabilitation worldwide.

We welcome submissions of original research papers, reviews, and case reports to this Special Issue.

Deadline for manuscript
submissions:

31 May 2024

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
